

ARCADE WOODWORKING

Antithesis of Mass Production |

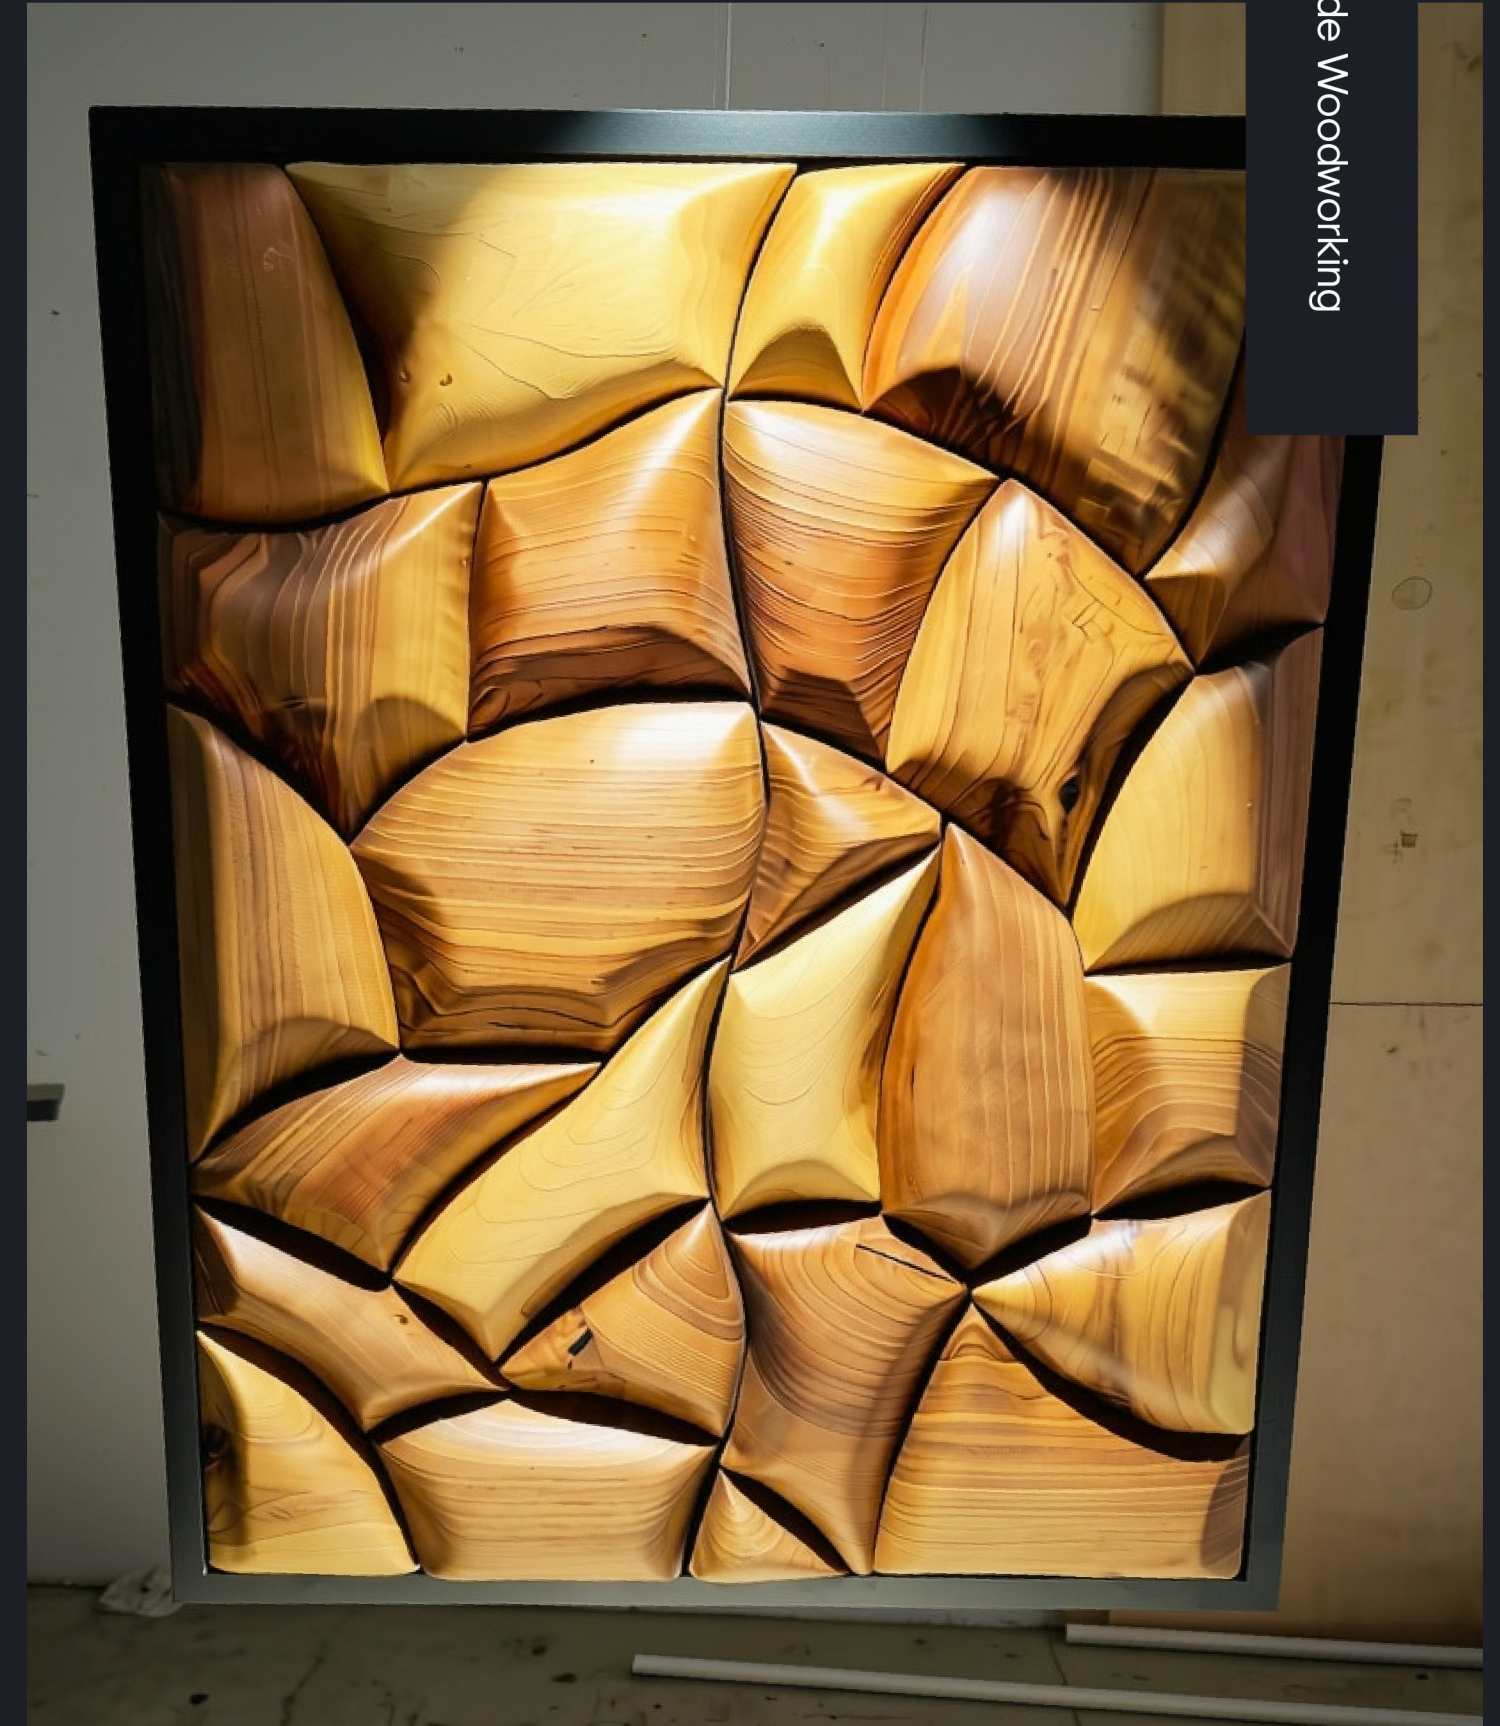

Introduction

Arcade Woodworking is a conceptual studio dedicated to crafting bespoke solid wood furniture of exceptional aesthetic and functional value. Our approach seamlessly merges traditional artisanal craftsmanship - utilizing hand-selected timber such as American walnut, European walnut, and oak - with modern architectural forms. Every piece is engineered with a focus on structural stability, precise joinery, and enduring quality.

We specialize in custom projects and high-end interior solutions, offering comprehensive technical and execution support to architects, interior designers, and B2B partners. From sculptural 3D relief wall panels to solid wood dining and executive tables, our goal is to create timeless statement pieces that define the spaces they inhabit.

Living Room

Designed as architectural focal points for modern interiors, our living room collection balances organic curves with the structural strength of solid wood. Each armchair and seating concept features seamless joinery, hand-finished surfaces, and integrated storage details - crafted to deliver both tactile comfort and a refined visual statement.

Key highlights:

- Premium solid American walnut and oak frames
- Bespoke upholstery in Italian leather, linen, and bouclé fabrics
- Concealed storage integration with soft-close mechanisms

Bedroom Furniture

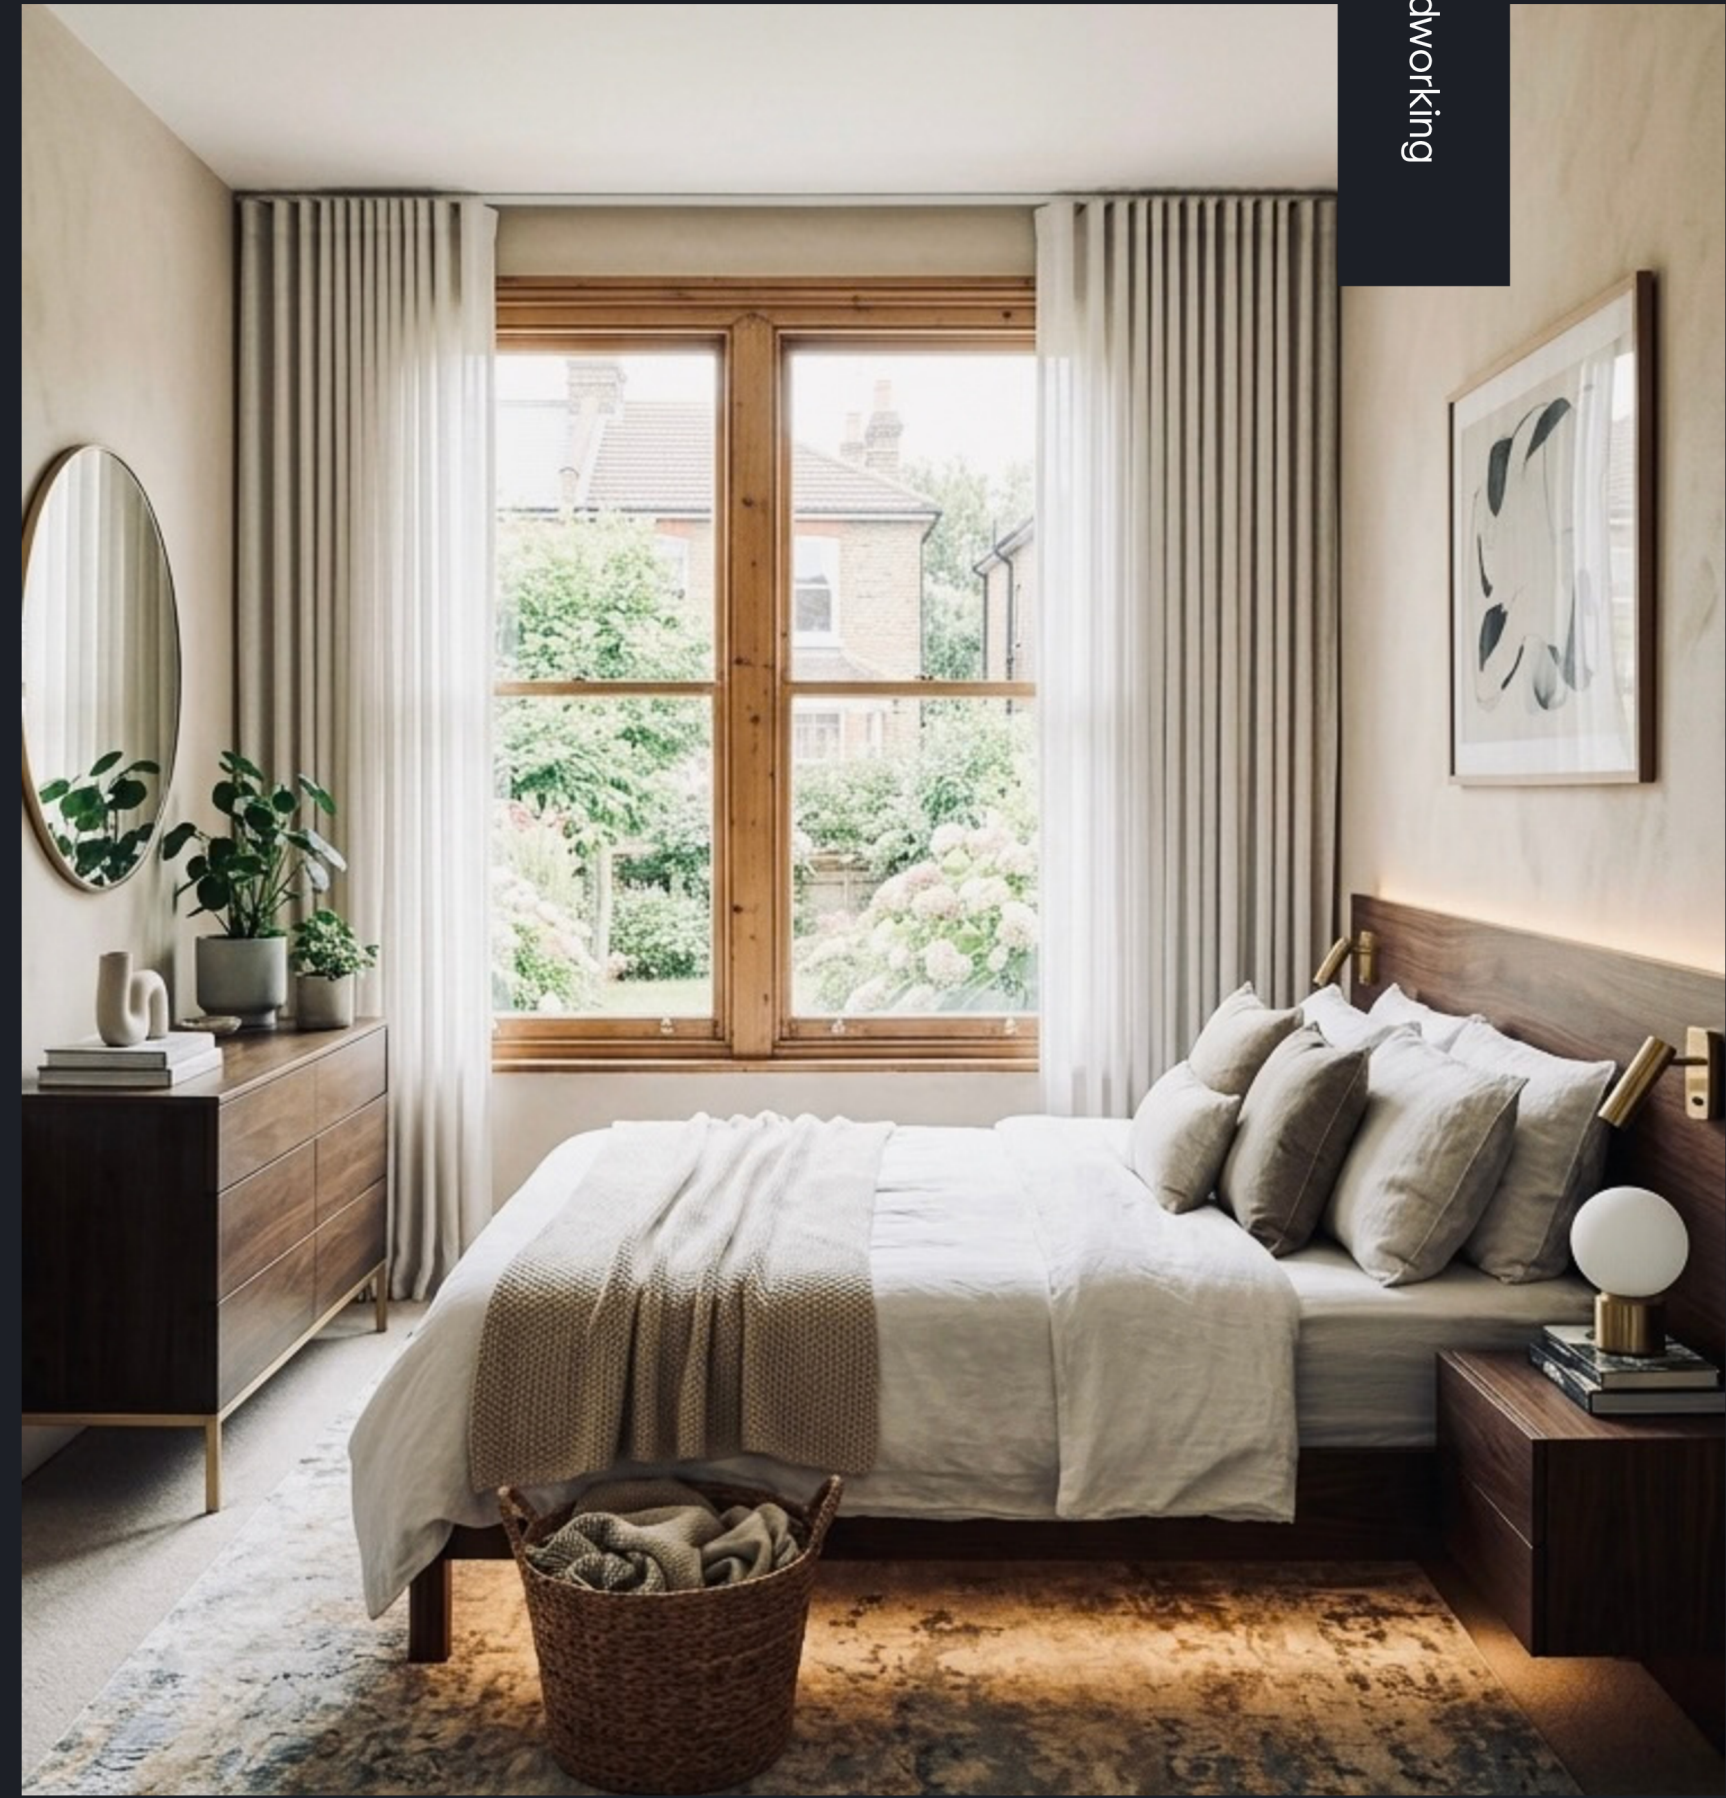

Our bedroom collection brings the natural warmth and grounding presence of solid timber into sanctuary spaces. Anchored by handcrafted bedframes and matching nightstands, each piece is engineered with floating joinery, integrated ambient lighting options, and subtle wood grain continuity across every surface.

- Hand-selected solid oak and American walnut construction
- Integrated nightstands and soft-close storage drawers
- Natural eco-friendly oil and wax finishes for healthier indoor spaces

Featured Concept: The Ascend Bedstead—crafted from solid walnut with floating platform geometry, integrated bedside tables, and a seamless natural-grain headboard.

Dining Collection

Designed to be the centerpiece of refined gathering spaces, our dining collection merges sculptural geometry with timeless solid wood construction. The Table features a hand-assembled louvered base that interacts dynamically with light, paired with ergonomic handcrafted dining seating.

Arcade Woodworking

Office Furniture

Arcade Woodworking

Designed for high-performance workspaces and executive home offices, our desk collection merges ergonomic functionality with uncompromising solid wood craftsmanship. From full executive suites to specialized bespoke concepts, every desk features integrated cable management, soft-close storage, and hand-finished timber surfaces.

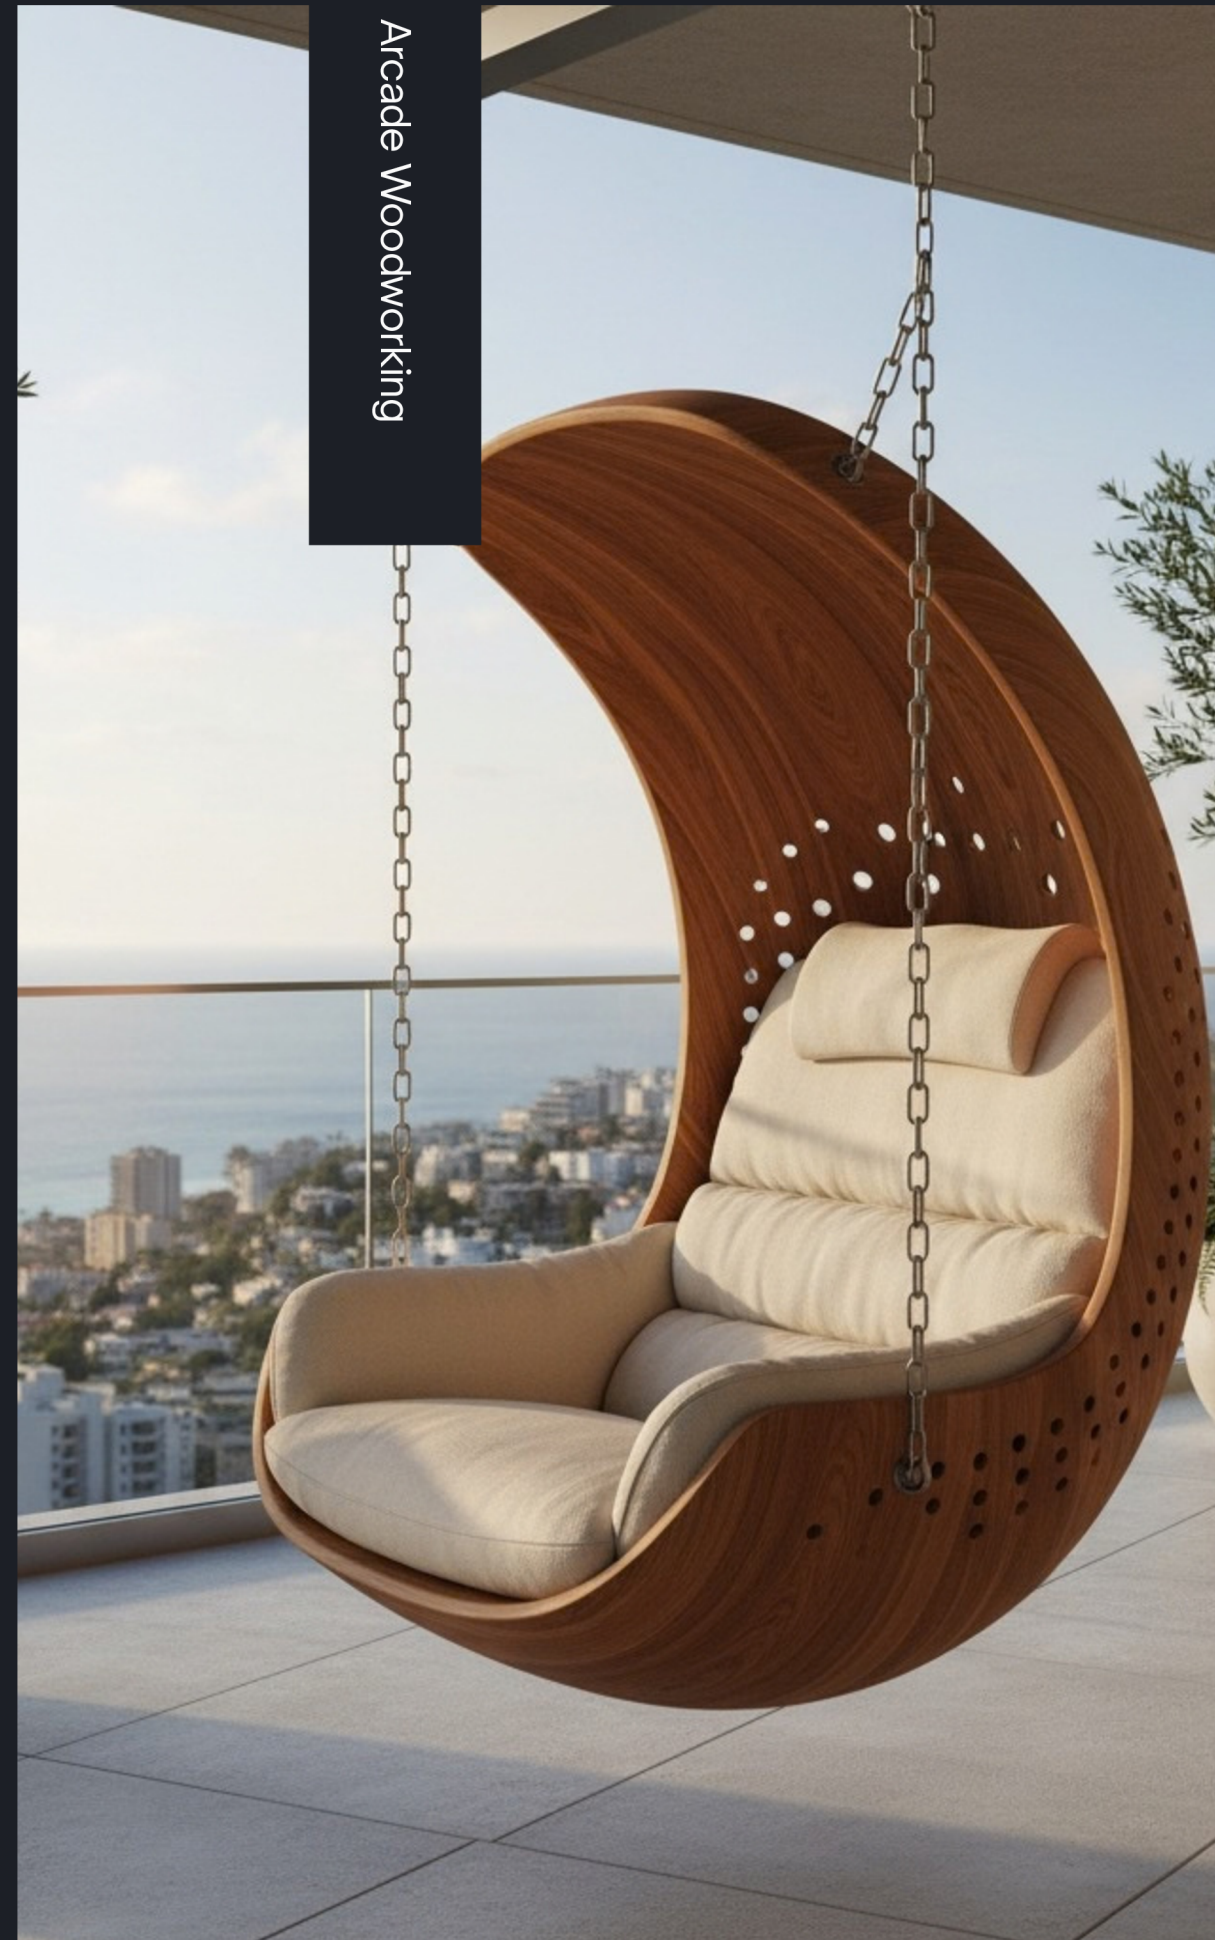

Arcade Woodworking

Outdoor Pieces

Engineered for high-end residential terraces, coastal estates, and luxury hospitality venues, our outdoor collection redefines exterior lounge living. By combining weather-resistant marine-grade hardwoods with precision steel hardware and bespoke outdoor upholstery, we create architectural statement pieces that seamlessly bridge indoor comfort with nature.

Arcade Woodworking

- Thermally treated solid hardwoods (Teak, Iroko, and Outdoor Oak)
- Stainless steel hardware and heavy-duty suspension systems
- All-weather hydrophobic cushions with premium fabrics

Featured Design: LUNA COCOON Hanging Lounge Chair - a floating sculptural sanctuary, featuring an ergonomic curved interior shell and fully weather-protected luxury cushioning.

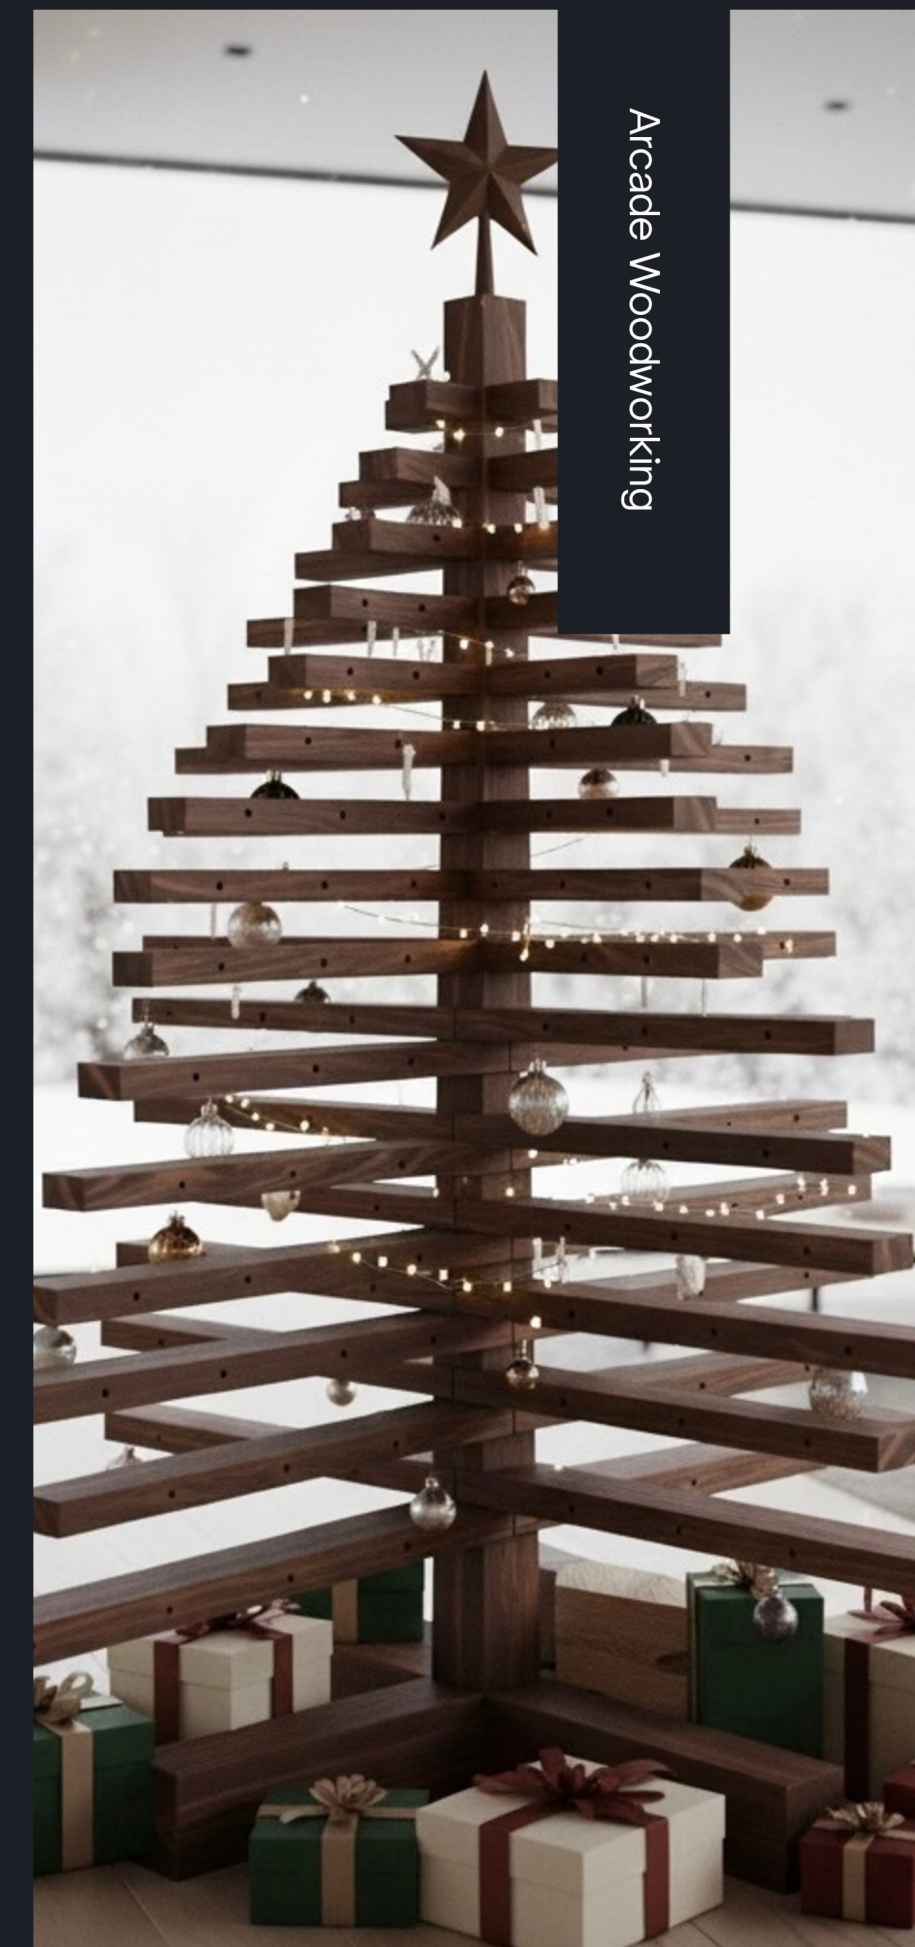

Also available: WAVE anatomical outdoor benches for large-scale architectural landscapes.

Design Aesthetics

We believe that true luxury lies in the harmony between natural timber geometry and intentional space design. Every Arcade Woodworking piece is conceived as a timeless statement, crafted to seamlessly integrate into modern architectural environments while elevating the sensory experience of natural wood.

Our furniture complements diverse architectural aesthetics:

- Japandi & Minimalist Organic: Clean lines, natural oiled textures, and understated warmth
- Modern Luxury & Executive: Rich walnut tones, brass details, and bold sculptural silhouettes
- Architectural & Urban Scale: Statement installations and custom geometry for expansive spaces

Materials & Craftsmanship

Sustainably Sourced Timber & Precision Processing

We work exclusively with hand-selected European Oak, American Walnut, European Walnut, Ash, Birch, and rare Bubinga. All timber is kiln-dried to a controlled moisture content of 8%–10%, ensuring maximum dimensional stability, resistance to climate fluctuations, and long-term structural integrity.

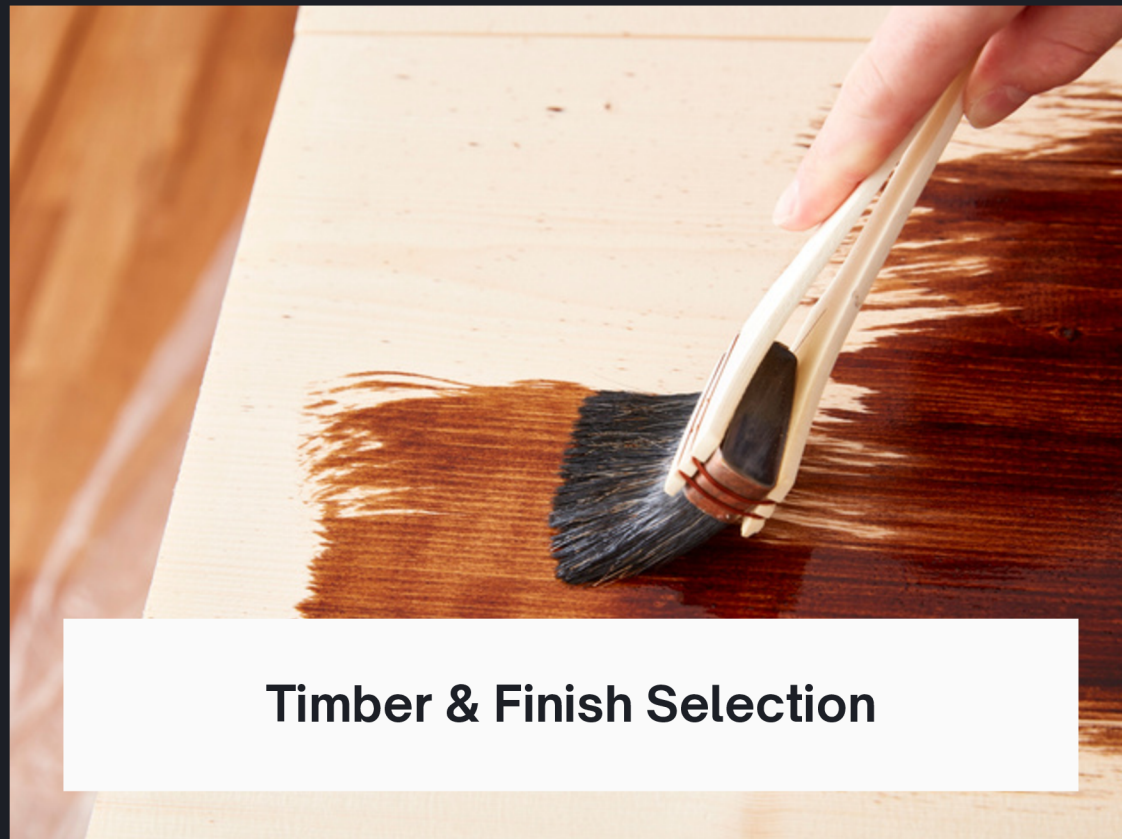

Natural Finishes & Precision Joinery

Every surface is finished using eco-friendly, zero-VOC natural hardwax oils and plant-based resins that preserve the wood's breathability and rich tactile warmth. Our production integrates traditional Japanese and Scandinavian joinery techniques with German soft-close mechanisms, concealed steel reinforcements, and D4 waterproof adhesives.

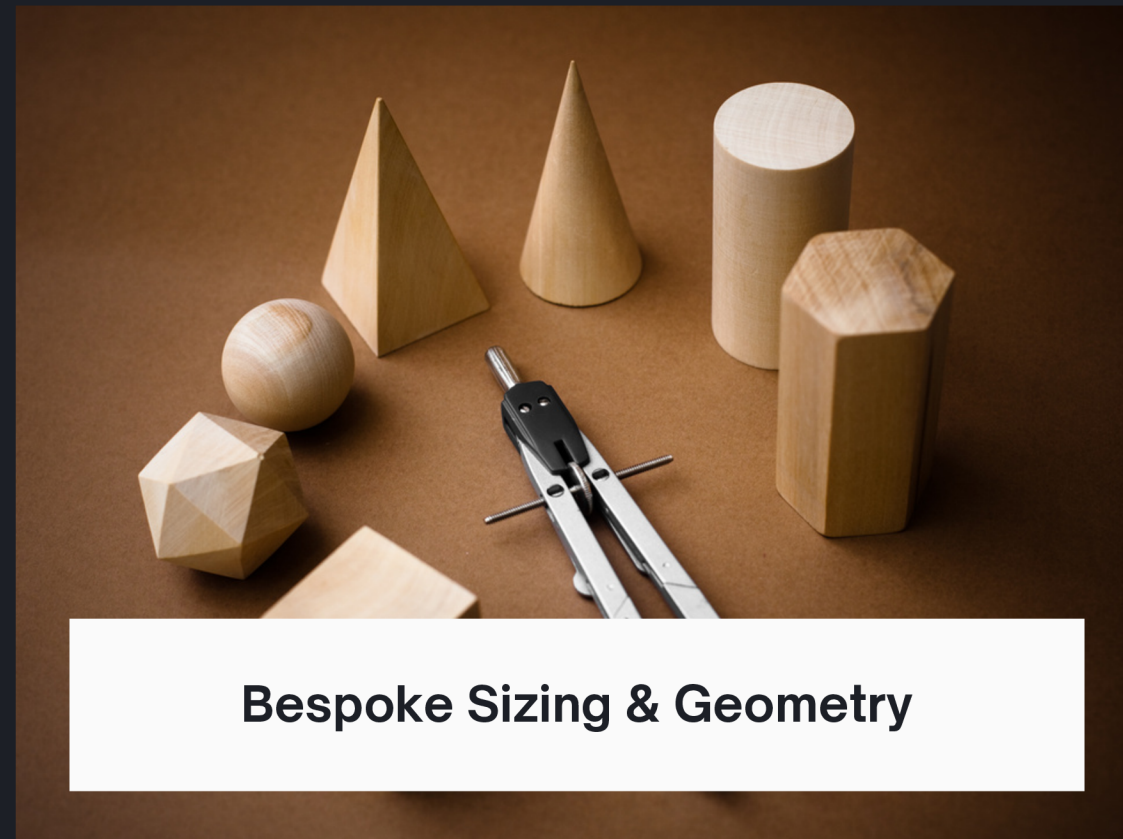

Customization Options

We partner closely with architects, interior designers, and B2B clients to tailor every design to specific architectural requirements. From bespoke dimensions to custom wood species, finishes, and integrated hardware, our manufacturing model supports full design flexibility without compromising structural integrity.

Timber & Finish Selection

Bespoke Sizing & Geometry

Integrated Hardware & Upholstery

Sustainability Commitment

Arcade Woodworking

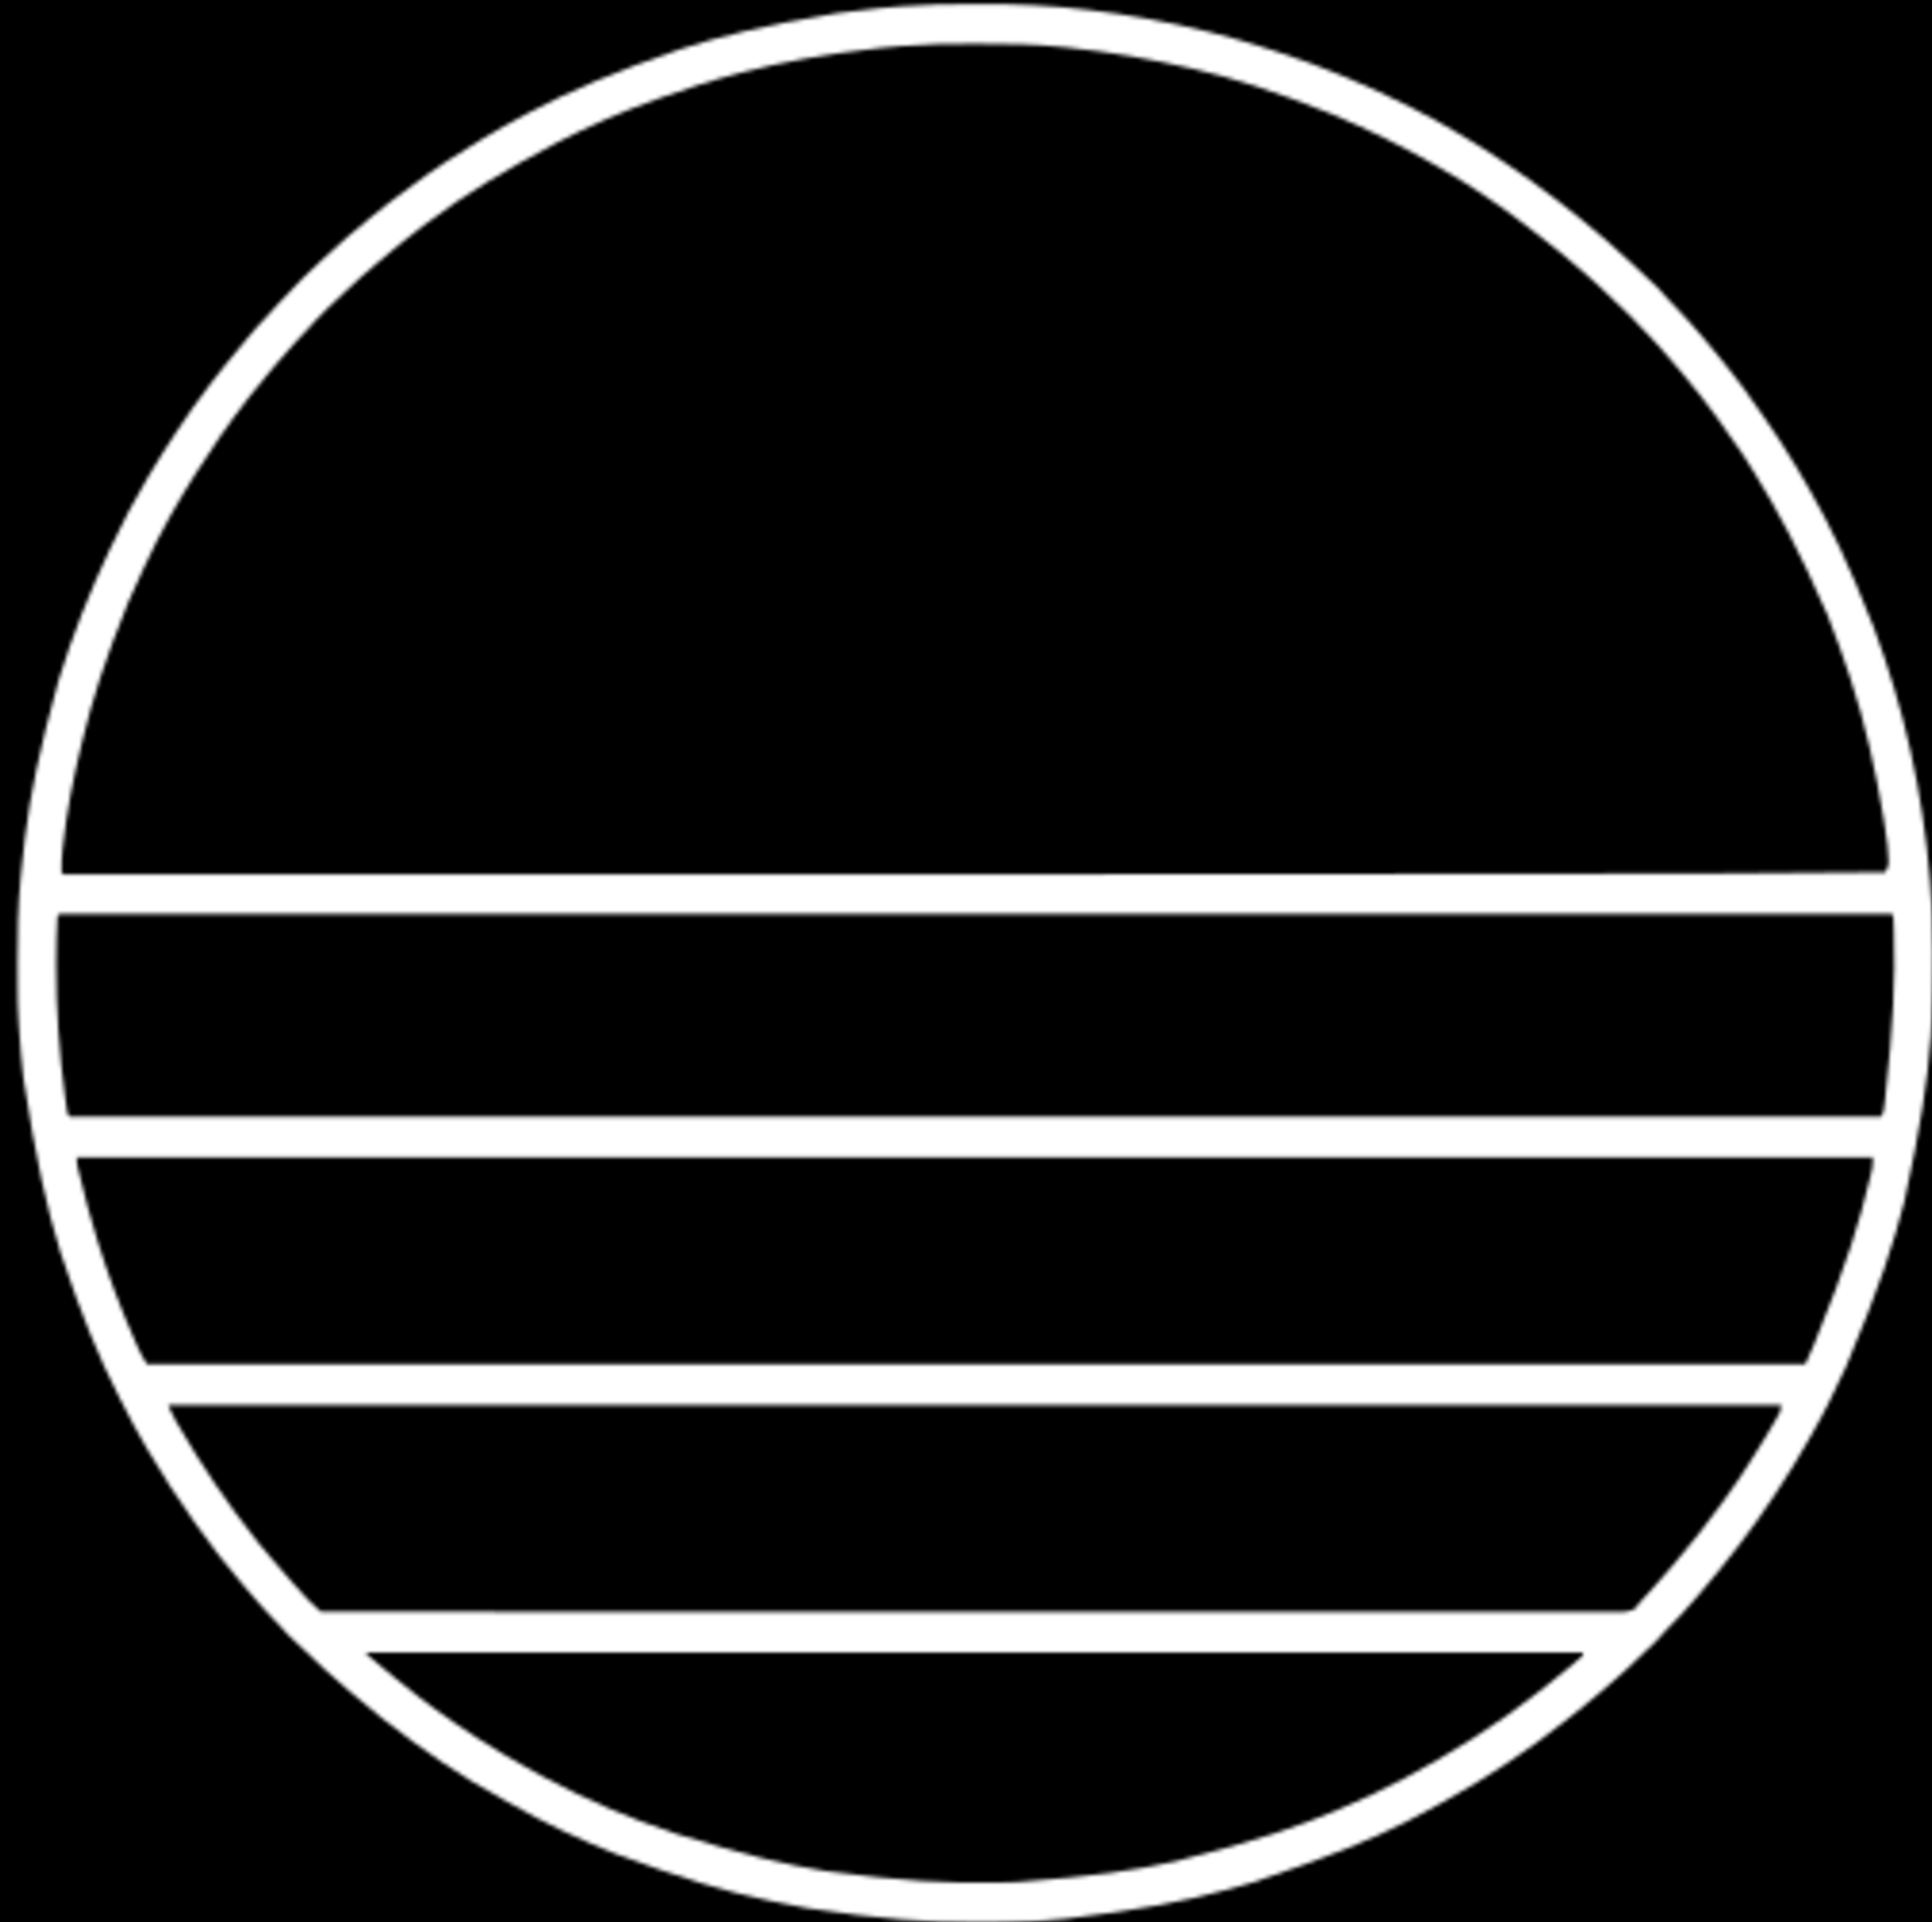

Our dedication to solid wood goes hand in hand with environmental responsibility. We prioritize timber from responsibly managed, FSC-certified forests, ensuring that every tree harvested is replaced. By focusing exclusively on solid wood construction rather than disposable composite materials, our pieces are built to last generations, minimizing environmental impact through longevity.

Our Environmental Pledge:

- 100% FSC-certified solid European oak, American walnut, and all other timber species
- Eco-friendly, VOC-free natural hardwax oils and plant-based finishes
- Zero-waste manufacturing process with wood offcuts repurposed for custom accents

Architectural Partnerships & Support

Whether you are designing a high-end private residence, a luxury hospitality venue, or an executive workspace, Arcade Woodworking provides full-service support from concept to installation. We collaborate directly with architects and interior designers to bring complex solid wood designs to reality with technical precision, custom material selection, and dedicated B2B trade terms
